A SAFE PLACE

Chicago.- Looking for a nice safe place to work? Try a high explosive plant!

The National Safety Council's statistical yearbook, "Accident Facts" just off the press, shows that the 1953-55 average accident frequency rate for high explosive plants is less than a third of the average rate for all industries. The plants manufacturing powder and fuses are also far below the average for all industries.

Apparently the very nature of the work makes everybody concerned more careful, the Council said.

News Around Town

By Mrs. Calvin Robinson

I liked this one:
Some of the harried husbands in the neighborhood had formed a "Henpecked Club," which met Saturday afteraoons in one of the member's garages for a little beer and poker. The newest member was dealing the first hand when his wife sailed into the garage, collared her spouse and, as she shook him, exclaimed, ::What do you mean by joining this club? Your're certainly not henpecked!" —C&O Tracks.

Mr. and Mrs. Ed Cawthorne will have as their guests this week-end, Mr. and Brs. Bob Doherty, of Washington, D. C. The Doherty's are Bostonians and are looking forward to touring the National Park Area at Old Appomattox, this being their first visit to this section.

If you have not, Mr. and Mrs. J. W. Martin have a lovely one in their yard at home. Mr. Martin says he brought the plant here from Florida about five years ago, and it's now about 5 feet tall and in full bloom. Has a mass of lovely white blossoms.
